

PTFE Modified Material

Code:PTFE Modified Material

Description

Kaxite is one of the leading China PTFE Modified Material suppliers and manufacturers, and with productive factory, welcome to wholesale PTFE Modified Material products from us.

Item no.:PTFE Modified Material

PTFE Modified Material

Product number:PTFE Modified Material

PTFE modified material is made from PTFE suspension resin with proper fillers such as glass fiber, glass microsphere, graphite, barium sulfate(BaSO₄), carbon fiber, molybdenum disulfide (MoS₂), polyphenyl, argil, etc. In process of molding or skiving.

[Applications]

It can be used for mechanical seal, chemical anticorrosion, chemical process vessel seal, machine tool guideways lubrication, bridge construction support slider and various kinds of pipe sealing in high temperature and high corrosive condition.
